400,000+ small farmers dominate coffee farms in Rwanda, each owning less than a quarter of a hectare. They cultivate Arabica coffee, almost exclusively of the Bourbon variety (95%). Since Rwanda is landlocked, transportation is an important issue farmers contend with due to cost and logistics. In 2008 the Cup of Excellence competition helped put Rwanda on the specialty coffee map.

**CUPPING NOTES:** Nice Acidity, Medium Body, Black Tea, Blackberry, Honeydew Mellon, Nice Complexity.

**NOT JUST COFFEE, YOUR COFFEE.**
