WE'VE GOT
YOUR BATCH

EXPORTER: Kerchanshe

ALTITUDE: 1,000 to 2,250 M

PROCESS: Full Washed, Dried on African Raised Beds

VARIETAL: Ethiopian Heirloom

HARVEST MONTHS: November to March

The Gedeo zone is within the state of Southern Nations and Nationalities People's Region in Yirgacheffe, which is a woreda (district) within the Gedeo Zone. The coffee is chiefly grown by small land holders who own around .25 to 2 hectares of land, which they call the garden production system. The small farms have crops growing under the shade of false banana and other nitrogen crops. The coops and washing and drying stations are the assembly points where all the cherries are collected for processing.

CUPPING NOTES: Bright Acidity, Medium Body, Cranberry, Lime and Pomegranate Notes. Very Nice Complexity.

NOT JUST COFFEE, YOUR COFFEE.
